Complaint:

4/01/03--OFFICE. Mr. David Reed called to inquire what Mr. Putman was doing on the Lomire property on Rt. 89. He has dug a trench and there was liquid in the trench. He was concerned that it was sewage. I told him I would look into it.

Investigation:

4/01/03--ONSITE. I talked to Mr. Putman who stated that during the ice storm, he lost power and he did not have his sump pump on. His basement flooded. He had a 1 1/2' of water in the basement. He dig a trench to pump the water into after he had power. I looked at the trench and it was clear water with no smell.

I will close out this complaint.
